While using the iPad Pro and Photoshop with the Apple Pencil, users have the ability to create and apply frames, use the Brush, access layers, control opacity, color, and more. Apple also taught the iPad Pro and the Apple Pencil to know differently when it comes to art and design. The Apple Pencil is a pressure-sensitive tool and the ordinary analog button is a toggle, meaning users can use either one as they please. The Apple Pencil has the advantage of maintaining pressure to enhance lines and markings, with the pressure toggles reverting to the default back when the Apple Pencil's pressure is released. Users can tweak sliders, masks, erasers, apply various filters, or add a specific amount of blur or sharpen to objects or photos. Other iPads and tablets also have the Apple Pencil available, but the Apple Pencil on the iPad Pro is a perfect device because it can be used in apps like Sketch. Users can doodle directly in apps, edit, and perform other tasks. This feature enables Photoshop users to build a creative canvas online by bringing an existing file into Photoshop and then turning the file into a "review" in the app. It's like a collaboration playground where multiple people can work together to edit a shared canvas in real time. Drop in any open photo and begin drafting, adding layers for text and placing images into the design. Give your creative team feedback by rating and commenting on the individual "reviews," and send special instructions for how to apply those edits to the original file.
